

COPPERHEAD INDUSTRIAL

Copperhead Industrial is at the forefront of innovation in renewable energy, generator power, and rental solutions. We consistently evolve to meet customer and market demands while championing Indigenous employment and empowerment initiatives.

Copperhead Industrial is uniquely positioned to meet diverse industrial needs across the Energy, Resources, Construction, and Infrastructure sectors. With a vast network of international suppliers and strong partnerships—rooted in lifelong friendships—with Viking Industrial and RAM Industrial, we combine technical expertise with mine-specific knowledge and experience.

We prioritise environmental sustainability and economic feasibility, offering cutting-edge solutions like advanced solar lighting towers and generators. Committed to local custom manufacturing, we provide durable industrial equipment designed to withstand challenging conditions. Our mission is to foster technical capabilities, stimulate economic growth, and promote skill development to build a sustainable future.

Our Services

-  Custom Equipment Manufacture
-  Turnkey Solutions
-  Critical Spares and Parts
-  Onsite Power Analysis (OPA)
-  24/7 Breakdown Support
-  Power Stations
-  Electrical Contracting

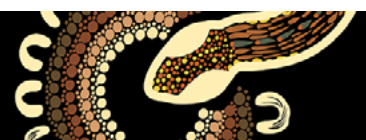

Our Products

-  Diesel Generators (Prime and Standby)
-  Lighting Towers (Solar and Diesel)
-  Solar Generators
-  Fuel Storage Systems
-  SCR Systems
-  Air Compressors
-  Industrial Pumps
-  Switchboards
-  Cable and Distribution Equipment

Australia-wide Reach

With our headquarters in Chinchilla and additional locations in Brisbane, Moranbah, Sydney, and Perth, we strategically service operations nationwide, with further growth opportunities on the horizon.

Established in 2019, Copperhead Industrial is a 100% Indigenous-owned and operated, Supply Nation Certified business, proudly owned and operated by Luke Gordon, a Quandamooka man with Traditional Owner connections to North Stradbroke Island.

Luke Gordon, Managing Director

"Copperhead Industrial is all about putting Indigenous professionals in the spotlight. Our mission is to engage motivated and talented people within the regions we operate. By developing a strong mentoring support network, we provide the processes and resources they need to succeed. We are building an in-house trainee and apprenticeship program to offer every opportunity for professional success and to help our teams achieve their personal goals"

At the core of the business, is a commitment to surpass 75% Indigenous workforce representation within 3 years. The aim is to create meaningful employment opportunities and drive positive wholesome transformation for individuals, families and communities. Through skill transfer programs, our trainees and apprentices receive hands-on experience, preparing them for real job roles within our business and across our partnerships. These programs are designed to make sure we have a diverse and sustainable workforce for years to come.

Beyond our workforce, we are committed to inclusivity and diversity within our supply chain. We actively engage with the communities where we operate and maintain affiliations with key organisations and alliances

With the Brisbane Olympics and Paralympics on the horizon, the company stands ready to offer its expertise in energy solutions, lighting towers and customisable delivery services. Copperhead Industrial's extensive experience and strong partnerships position it to meet the infrastructure demands of this world-class event. Copperhead Industrial is primed to play a pivotal role in making the Brisbane Olympics and Paralympics a resounding success.

PROVEN SUCCESS

KENNELLY RAAF GENERATOR SERVICE

At the Townsville Central Emergency Power Station Replacements project, Copperhead's Chinchilla branch installed and factory-tested three 1800kVA generators with custom hose brackets, engine oil monitoring systems, and sensor upgrades.

QCG OIL AND GAS SITES

Since March 2023, our Chinchilla branch has been supplying QCG in the Surat Basin with industrial equipment such as generators, compressors, and solar lighting towers, along with parts and consumables. We use remote monitoring on generators to understand power requirements, offering more efficient power and equipment solutions to save fuel.

BMA MINING RENTAL

Since 2020, our team in partnership with RAM Industrial's Moranbah branch has supplied rental generators, diesel and solar lighting towers, fuel storage, and parts to BMA across multiple coal mining sites in the Bowen Basin. We also supplied custom turtle-friendly lighting for shutdown work at Hay Point.
